## PROFESSIONAL SUMMARY

Front-End Engineer with 5 years of experience developing user-friendly and feature-rich web applications using React JS and Typescript. Proactive problem-solver and enthusiastic learner familiar with modern SaaS product development.

## WORK EXPERIENCE

### Front-End Engineer, Leeto

Jan 2021 – Aug 2024

- Built and enhanced most important product features, used by over 30000 monthly active users. Resulting in the company acquisition by an international group.
- Architected and developed a brand new reimbursement request feature independently. Ensuing decrease of refused requests by moderation team from 30% to 10%.
- Enhanced application to meet PWA quality standards in order to publish the application on mobile app stores. Resulting in resolving the most requested feature by users and ARR increase.
- Built and documented an internal design system, ensuring cohesive and consistent user interface.
- Implemented end-to-end, integration and unit tests in order to improve test coverage from 0 to almost 80%.
- Technologies: React JS, Typescript, TanStack Query, Cypress, React Testing Library, Github Actions, Storybook

### Front-End Engineer, Yuso Fleet

Oct 2016 – Sept 2018

- Contributed to the development of an “Uber-like” web application, enabling ride booking and fleet management as a white-label SaaS product.
- Led the redesign and implementation of a marketing website using WordPress, increasing online visibility and lead generation.
- Collaborated with a cross-functional team to design and deliver innovative features, enhancing the user experience and meeting client needs.
- Documented solutions and best practices to ensure optimal maintainability of delivered products.
- Technologies: AngularJS, Angular Material, WordPress.

## WORKING HOLIDAY EXPERIENCE

### Canada (Montréal)

2019

- Explored Canadian culture and improved English proficiency through immersive experiences and daily interactions.
- Took on various temporary jobs to support living expenses, including roles in customer service and logistics, enhancing adaptability and interpersonal skills.
- Leveraged the opportunity to network with diverse professionals and broaden personal and professional horizons.

## SKILLS

**Languages:** JavaScript, TypeScript, HTML, CSS

**Technologies:** React, TanStack Query, Tailwind CSS, Vite, Cypress, React Testing Library, Jest, Storybook

## EDUCATION

### Master Degree, Computer Science, EPITECH

- Specialized in Software Engineering, Web Development, Testing, and Project Management.
- Completed various web development projects, showcasing versatility in modern technologies and adherence to best practices.
- Led team-based projects, focusing on Agile methodologies, version control systems (Git), and CI/CD pipelines to deliver high-quality software solutions.
- Gained hands-on experience with modern frameworks, libraries, and tools used in the industry.
